DETAILED ACTION

Allowable Subject Matter

Claims 1-14 and 17 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious an interferometer for disc surface inspection including: an information processing system coupled to a first and second detector so as to determined out-of-plane displacements between a mirror and a disc surface as a function of phase change in the interferometer's output beams, in combination with the rest of the limitations of claim 1.

As to claim 12, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for media surface inspection including: using an information processing system to unwrap a first and second phase angle; and comparing the unwrapped first and second phase angles to determine beam displacement caused by variations in a disc surface as a function of phase change in an interferometer's output beams, in combination with the rest of the limitations of claim 12.

As to claim 14, the prior art of record, taken alone or in combination, fails to disclose or render obvious a signal-bearing medium containing a program which, when executed by a processor in response to inspection of a disc medium surface, causes execution of a method including: using an information processing system to unwrap a first and second phase angle based upon sinusoidal equations; and determining displacement caused by variations in the disc media surface, in combination with the rest of the limitations of claim 14.
